Arcam DT81 digital radio tuner - Arcam | bringing the best ...

The arrival of Digital Radio offers the listener interference free reception with an utterly silent background, an end to confusing frequencies and an ever-growing choice of new, digital only stations. Arcam's stylish replacement for the Alpha 10 tuner is the DT81, which receives DAB programmes on both Band 3 and L-Band and sets new standards in both sound quality and ease of use.

DiVA DT81 DAB Tuner - - Arcam

I owned 2 DT81's bought in Sevenoaks HiFi: don't waste your time, with the shop or Arcam's DAB tuners. The 1st one bought in Jan 2003 developed a fault (it would keep coming up with 'service not found' on the display, even though the portable DAB unit I own worked fine)) soon after purchase and was sent off to Arcam 'for repair'.

The Arcam DT81 is fitted with optical and co-axial digital optical outputs and standard phono connectors. It also has an RDI output (data service

interface, carrying EPG and programme data, for example) and a FM tuner input, allowing you to piggy-back an existing tuner into the Arcam DAB-only tuner, to reduce the number of connections you would otherwise need into the amplifier.
