What an examiner requires is a computer forensics toolkit. The best practices for this type of incident response are constantly under review as the technology changes. For example, there was once a time that examiners would pull the plug on most systems to preserve the evidence in the state in which it was found.

goals of incident

response and forensic

analysis is perhaps the
most important.

Incident response is
focused on determining
a quick (i.e., near real
time) reaction to an
immediate threat or
issue. For example, a
house is on fire and the
firemen that show up
to put that fire out are
involved in incident
response.

Digital Forensics and Incident Response (DFIR) is the application of forensics for cybersecurity use cases to examine data breaches, malware, and more. Guidance Software created the category for digital investigation software with EnCase in 1998 as a tool for law enforcement to solve criminal cases.
