ISO Guide 35:2006

Homogeneity assessment of reference materials is discussed with particular reference to the recommendations given in ISO Guide 35. It is suggested that Guide 35 could be improved by the addition of a wider range of experimental designs, and by using statistical power calculations to improve the recommendations for design of experiments for homogeneity assessment. It is further shown that the ...

ISO Guide 35 - Innovation and Technology Commission

Since the release of ISO Guide 35 in 2006, ISO Guide 34 has been revised and now relies more heavily on ISO Guide 35 for technical guidance. In addition, developments in RM production methods have increased the range of techniques used in RM production, while increasing use of ISO Guide 34 has established a need for more widely applicable technical guidance covering a greater range of classes of RM.
