The fiber optic, because it is a dielectric, responds non-linearly to the signal power intensities along the link length [3]. There are two categories of nonlinearities that can be observed in fiber optic communication systems, one is given by inelastic scattering processes: Stimulated Raman Scattering (SRS)...

The book is very good in its content and very helpful for people who are learning about optical fibres at any level. But the appearance of the book was disappointing. Book had been wet once and I didn't expect such an experience from amazon. Since getting this book was urgent I can't afford any time to return the book and get another in exchange.

The communication system of fiber optics is well understood by studying the parts and sections of it. The major elements of an optical fiber communication system are shown in the following figure. The basic components are light signal transmitter, the optical fiber, and the photo detecting receiver.
